Industry Analyst Reviews

Freshservice earned the "Challenger" position for its ability to execute and deliver a user-friendly, scalable ITSM platform that simplifies service management for businesses of all sizes. Its modern features, like AI-powered workflows and robust incident and asset management, make it highly adaptable and easy to implement. Freshservice stands out by providing an innovative, efficient ITSM solution without the complexity of traditional platforms.

The Customers' Choice award for 2024 from Gartner Peer Insights highlights Freshservice's strong reputation among end users. Customers have praised its ability to streamline IT operations, provide advanced automation for workflows, and ensure smooth integrations with other business tools, making it a trusted choice for businesses of all sizes.

Freshservice was recognized on the Capterra Shortlist for 2024 due to its excellent usability, value for money, and feature-rich IT service management (ITSM) platform. Its robust asset management capabilities and intuitive user experience make it a favorite among IT teams, earning high customer satisfaction scores and solidifying its place among the top ITSM tools of the year.

In Spring 2024, Freshservice secured its position as a G2 Leader by excelling in customer reviews and achieving high satisfaction ratings. Its extensive ITSM functionality, reliable customer support, and scalability for businesses earned it top scores, proving its effectiveness for both small businesses and large enterprises.

The TrustRadius Top Rated award for 2024 reflects the consistent appreciation of Freshservice by IT professionals for its transparency, ease of implementation, and detailed reporting capabilities. Its comprehensive set of features and responsive support team received exceptional user feedback, making it one of the most trusted ITSM platforms of the year.

Forrester Review

Freshservice, as evaluated by Forrester in their Total Economic Impact™ (TEI) report of July 2023, offers several key benefits that make it a standout IT Service Management (ITSM) solution.

Here's a summary of the report's highlights:

- **Improved Service Agent Productivity:** Freshservice streamlined ticket management with its intuitive interface and AI-powered Virtual Agent, reducing reliance on unofficial channels like email and phone calls. This resulted in fewer manual processes and deflected simpler tickets, driving a three-year productivity gain valued at \$2.1 million.
- **Enhanced End-User Productivity:** The platform's easy-to-use forms and self-service options allowed end-users to resolve issues independently, reducing the time spent on ticket submissions and follow-ups. These improvements contributed nearly \$596,000 in productivity gains over three years.
- **Improved IT Operational Efficiency:** Freshservice optimized workflows and change management processes, saving significant time for IT teams. By automating tasks like asset information entry, organizations gained nearly \$221,000 in efficiency improvements within three years.
- **Cost Savings from Legacy System Replacement:** Transitioning from outdated systems to Freshservice eliminated high operational costs associated with legacy platforms. Organizations saved approximately \$676,000 over three years by retiring old systems.
- **Advanced Reporting and Analytics:** With tools like Ask Freddy AI and interactive dashboards, Freshservice provided real-time insights and automated reporting, eliminating time-intensive manual data extraction. This led to a modest yet impactful productivity gain of \$15,000.
- **Unquantified Benefits:** Freshservice also improved user satisfaction with streamlined ticketing and better security permission management, contributing to positive customer experience metrics, such as a 95% satisfaction score from user surveys.

Overall, Forrester reported a 356% ROI for organizations using Freshservice, with a payback period of under six months, validating its strong cost-effectiveness and operational benefits. This makes Freshservice a compelling ITSM solution for businesses looking to modernize their IT operations.
